

Created by Bintintan Andrei, Interpid Team

Description

This method allows printing of **<TAG>** formatted text with line breaks. They can be automatic (as soon as the text reaches the right border of the cell) or explicit (via the **\n** character).

Features:

- Text can be **aligned**, **centered** or **justified**
- Different **Font**, **Sizes**, **Styles**, **Colors** can be used
- The cell block can be framed and the background painted
- **Links** can be used in any tag
- **TAB** spaces (**\t**) can be used
- Variable Y relative positions can be used for **Subscript** or **Superscript**
- Cell padding (left, right, top, bottom)
- Controlled Tag Sizes can be used

Paragraph Example:

- Paragraph 1
- Paragraph 2
- Paragraph 2
- Paragraph 3
- Paragraph 1
- **Paragraph 2**

Sample text

Sample text

Observations:

- If no **<TAG>** is specified then the FPDF current settings(font, style, size, color) are used
- The **ttags** tag name is reserved for the TAB SPACES
